The AI Programmer will develop generic systems in the field of game AI supporting the game's content and game play creation.

Your tasks:

- Develop state-of-the-art AI technology, AI modules and systems
- Design, implement, test and document the technical aspects of features for a AAA game
- Create workflows to support data-driven AI solutions
- Work together with other international Ubisoft studios
- Work with fellow teammates to conceptualize and realize functionality

Your profile:

- Some years of professional experience
- Experience in AI programming
- Proficient knowledge in C++
- Experience in programming readable and extendable code
- Strong ability for analyzing and extending existing code
- Excellent teamwork abilities including other international studios
- Ability to predict task duration and understand dependencies
- Fluent in English

What we want to offer you:

We want to build a studio in which everyone feels inspired, empowered and connected. We believe people do their best work when they feel empowered. We thus aim to give you a lot of autonomy. In return, we expect you to be self-responsible and stay on top of your game by continuously developing your skills. Furthermore, we know it is important for an employee to feel comfortable. With that in mind, we aim to provide a variety of everyday benefits which we hope will help you feel great including:

- Flexible working hours
- External training, education in our in-house guilds and knowledge sharing with other project teams
- Fresh fruit, discounted gym membership, support for child care, company pension scheme
- Share ideas! = Working in an innovative and international company

If you are passionate about video games and would like to work with like-minded professionals with an international team, please apply via our career portal.
