As our Full Stack Web Developer you will design, develop and deploy both frontend and backend applications, enriching the Ubisoft Connect ecosystem and empowering the team to handle player-facing features and contents.

As part of the production team, you will be involved in the implementation of features and components throughout the full spectrum of web development. You will be using a variety of technologies and programming languages, including but not limited to C#, TypeScript, SCSS and frontend frameworks like Vue.js and Angular.

You will work closely with a multi-disciplinary team of programmers, designers and testers where everyone is willing to share their knowledge and are encouraged to evolve every day. The team spans across several countries and is characterized by passion, collaboration and the love for PC gaming.

You will be using a wide spectrum of technologies ranging from frontend to backend, TypeScript to C#, component styling to data persistence.

Specific responsibilities include:

- Write clear, modular and maintainable code
- Work on both front- and backend application in the context of Ubisoft Connect
- Be part of an agile team collaboratively working on technical designs, new features as well as steady improvements of existing code

You will also have the option to visit and work from collaborating studios.

You are seeking the opportunity to contribute with both your experience and passion to one of the biggest gaming platforms. You are eager to involve yourself in the development of new features, general improvements and the steady modernization of our web applications.

- Excellent C#, JavaScript/TypeScript, (S)CSS and HTML skills
- Knowledge in the following topics: ASP.NET, .NET Core, SQL, REST, automated testing
- Hands-on experience in developing SPAs with modern frontend frameworks (Vue, Angular,

React)

Nice to have

- AWS,
- ElasticSearch
- Python
- Protocol Buffers
- Continuous Integration
